

SPEEDWAY

Turntable

The Speedway 36" or 48" turntable can be used for in-feed or accumulating your product.

These turntables are constructed from stainless steel and provide a sturdy corrosion resistant product at a reasonable price.

Turntables come with quality guide rails, AC variable speed drive and stainless steel threaded leveling feet which allows for a height adjustment of 34.5" minimum to 37" maximum.

Conveyor systems to complement your turntable are available.

Casters are optional.
